

Dear Reader,

There are many ideas, but in the end it is important to put them into practice.

At Hensel, we enjoy many good ideas that emerge from our customers and ourselves - and that we can then successfully translate into new products and services.

With the Mi-Connection Box is such a good idea been put into action:

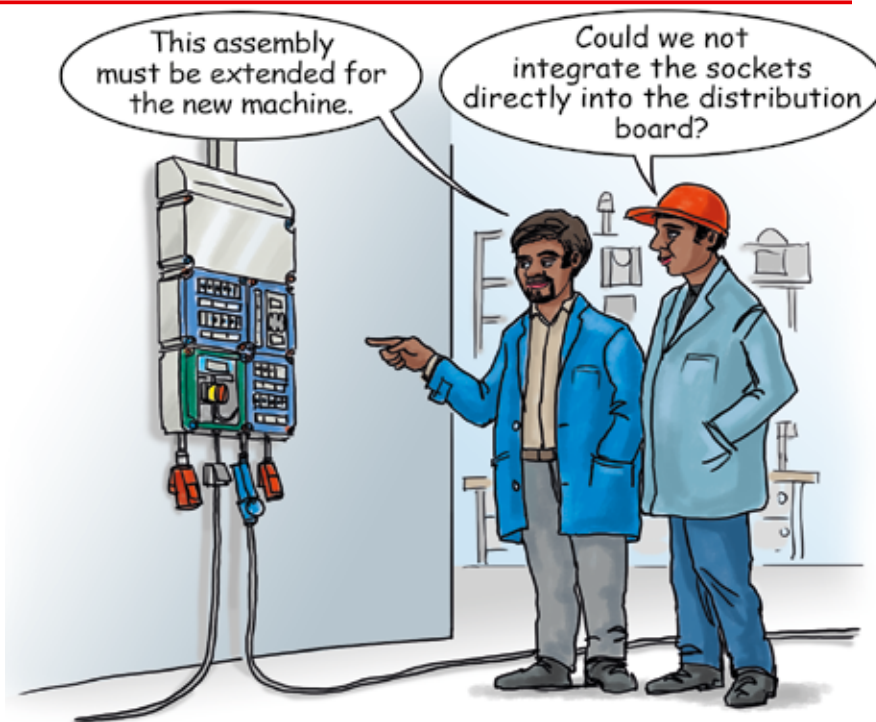

The world market leading, combinable Mi distribution board system in degree of protection IP 65 and up to 1000 A rated current of busbars has therefore been finally expanded to become the most flexible distribution board system. The positive response from our customers around the world confirms this.

Even existing systems can hereby be useful, inexpensive and technically advantageous supplemented.

Good ideas put into practice:

We have some great ideas for you in the pipeline!

Philipp C. Hensel
Managing director of
Gustav Hensel GmbH & Co. KG

Well combined - easy to use:

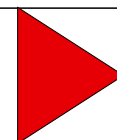

Mi CONNECTION BOX – the integrated system solution within the Mi system of Hensel!

Sockets are often installed near assemblies of distribution boards.

A lack of system solutions means often a higher installation effort for socket devices, buttons, switches and signalling devices u.a.m.

With the Mi CONNECTION-BOXES, Mi distribution boards offer an integrated system solution for electricians!

The system solution for electricians ...

Missing system solutions often means compromises and usually a higher installation effort!

Well-known solutions in installation technology

Example:
Power distribution boards with individually installed sockets are often associated with high installation costs and a poor appearance.

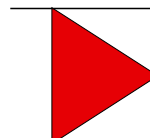

Example:
Installation of signaling devices in the cover of enclosures often cause compromises and high assembly costs!

Example:
A lateral mounting of sockets to enclosures often mean a poor access in handling.

Individual solutions remain patchwork and also have no future!

- complex installation
- compromises in optics
- high installation costs

Really trendy: Integrated system solution for the electrician ...

Mi Connection Boxes - the integrated system solution with know-how: Flexible, customized and according to your individual needs!

System solutions instead of accepting compromises!

Mi CONNECTION BOX

- for mounting on 300 mm-enclosure walls
- for the installation of devices that must be operated externally, such as plug-in devices, buttons and switches, degree of protection IP 65
- combinable within the Mi System

Very easy - the system solution!

Assembly of the base of a Connection Box to Mi distribution boards via wedge connections

Select built-in devices.
Transfer and mark dimensions.

Pre-drill device cutouts or saw off with a jigsaw, depending on the shape.

Install and wire built-in devices.

Swing in the hinged mounting surface of the Connection Box and screw into place.

Pre-assembled available with built-in sockets.

Integrated system solutions are trendy:

- They reduce the installation effort
- They allow a space-saving installation
- They allow a visually perfect solution

System solutions are the future of installation practice: Mi-CONNECTION BOXES for mounting on Mi distribution boards!

CONNECTION BOXES

- for mounting on 300 mm-enclosure walls
- hinged installation area
- with wall seal
- material high quality polycarbonate
- colour grey RAL 7032

Mi CB 10
for individual
device installation

Mi CB 14
1 x 32 A, 5-polig,
400 V, 50-60 Hz, 6h
1 x 63 A, 5-polig,
400 V, 50-60 Hz, 6h

Mi CB 11
2 x 16 A, 5-pole,
400 V, 50-60 Hz, 6h

Mi CB 15
1 x 32 A, 5-pole,
400 V, 50-60 Hz, 6h
1 x 63 A, 5-pole,
400 V, 50-60 Hz, 6h

Mi CB 12
1 x 16 A, 5-pole,
400 V, 50-60 Hz, 6h
1 x 32 A, 5-pole,
400 V, 50-60 Hz, 6h

Mi CB 16
1 x 16 A, 5-polig,
400 V, 50-60 Hz, 6h
4 x 16 A, 2-pole+E,
230 V

Mi CB 13
2 x 32 A, 5-pole,
400 V, 50-60 Hz, 6h

Mi CB 17
1 x 32 A, 5-polig,
400 V, 50-60 Hz, 6h
4 x 16 A, 2-pole+E,
230 V
