## Safe product solutions for Photovoltaic plants

**2016/2017**

# Solar powered by Hensel

The photovoltaic market is going to grow significantly in coming years as more and more investors and home owners are betting on solar power's high margin electricity. With our ENYSUN distribution board systems for photovoltaic plants conforming to standards, we support you in accessing this market. ENYSUN is a high value, modular system, which generates additional sales potential for you on the growing photovoltaic market.

Profit from a system which offers you clear competitive advantages on the market and which you can always rely on.

Professional Photovoltaic Distributors

## Hensel is the market leader in innovative products and services for electrotechnical building facility.

Founded in 1931, Hensel is now part of an international group of companies doing business around the world. It has its headquarters in Lennestadt, Germany and subsidiaries in the most important international markets to provide an international presence and assure that the company is never far away.

Successfully mastering the future means cooperation in dialog for Hensel. The exchange with market partners and the consistent focus on practical challenges is a transfer that provides valuable inspiration for further development of products and services.

Where environmental influences, dust and moisture demand particularly demanding installation technology, Hensel enables safe energy distribution with innovative solutions. The program of modern installation and distribution systems for national and international applications have made HENSEL a market leader in tapping, fusing and distributing electrical energy in the low voltage sector.

Hensel guarantees its customers continually high standard of quality with decades of production expertise and a quality management system strictly in adherence with the DIN EN ISO 9001-2008 standard at all its factories.

# The Company

## Highest quality for the highest requirements

Since 1931 HENSEL has been developing and manufacturing innovative solutions for electrical equipment in buildings. Electrical installation and distribution systems made of high quality thermoplastic are used today because of their special properties in areas where dust and humidity place high demands on the electrical installation.
